4 wks

from idea to launch

CS student who ships production apps end to end — product, frontend, database, security and AI. I engineered Codyza on my own, and every project below is live for you to try.

PROJECTS

- **Codyza** · Co-Founder & Lead Developer
codyza.com · Next.js · TypeScript · Supabase · Gemini AI · Vercel

JAN 2025 – PRESENT

 - Co-founded and solely engineered a live developer community — **35+ contributors** and **25+ shipped projects**, launched in under 4 weeks with zero paid marketing.
 - Built an **AI code-review pipeline** on Gemini that scores every submission across 6 quality dimensions and awards XP automatically, removing manual review.
 - Engineered an **8-tier XP system** with rank progression, streaks, a leaderboard and public contributor profiles.
 - Automated **hiring and onboarding**: applications, onboarding check-ins, task nudges and a ticket system linked to GitHub pull requests.
 - Secured it with **Supabase RLS**, JWT auth, invite-only access, two-factor admin sign-in and an audit log, across a design system of 15+ pages.
- **AI Project Reviewer** · Solo Developer
Live demo · Open source · Next.js 16 · TypeScript · Gemini AI · Upstash

2026

 - Paste a public GitHub repo, get an honest review **scored 1–10** on code quality, originality, completeness and docs — grounded in the actual code, not the README.
 - Streams real progress as each server step finishes; **SSRF-hardened** site fetching with DNS-pinned lookups, released as the zero-dependency library **safe-url**.
- **Subentra** · Solo Developer
Live demo · Code · Next.js · TypeScript · Recharts · Claude API

2026

 - Spend and contract-renewal forecasting for finance teams: imports **SAP actuals** and tracks plan vs actual by department and category.
 - Flags renewal notice deadlines before they pass, with one-click **AI executive summaries** and every AI action audit-logged.

SKILLS

Languages	TypeScript, JavaScript, Python, Java, HTML/CSS
Frontend	React, Next.js, Tailwind CSS, Framer Motion
Backend	Node.js, Supabase, PostgreSQL, Row-Level Security, REST APIs
AI	Gemini, Claude API, OpenAI API
Tools	Git, GitHub, Vercel, CI/CD, Upstash, Resend, Stripe

EDUCATION

B.S. Computer Science · Expected May 2028
Southwest Minnesota State University
Data Structures · Object-Oriented Design · Computer Organization & Architecture

EXPERIENCE

Student Worker · 2024 – Present
Southwest Minnesota State University — Cafeteria, TRC and Athletics
Balance three campus jobs alongside a full course load.
